

Web Entry Form

I'm not receiving any emails at all when I submit my web entry form. However, I do get the confirmation page.

Since you are getting the confirmation page make sure, if you are using multiple email addresses, to use a comma and not a semi-colon.

If that's not your issue, make certain you are using the right version of OfficePool and not a previous year's version.

Lastly, check your email's SPAM folder.
